

Bilaga 1 Litteratursökning

Detta är en detaljerad beskrivning av den sökstrategi som använts i den systematiska översikten *Att genom lek stödja och stimulera barns sociala förmågor – undervisning i förskolan*.

- Sökning i internationella vetenskapliga databaser
- Sökning i skandinaviska vetenskapliga databaser
- Handsökning i utvalda tidskrifter
- Citeringssökning

Sökning i internationella vetenskapliga databaser

Databassökningarna utformades genom att projektgruppen först identifierade nyckelbegrepp och relevanta sökord inom kategorierna förskola och lek. Söksträngen, det vill säga de kombinationer med ord som matas in i databasen för att hitta relevanta studier, byggdes sedan upp med hjälp av testsökningar. Söksträngens logik bygger på att ord både från ordgruppen förskola och från ordgruppen lek ska finnas med i studiens titel eller sammanfattning.

Sju databaser genomfördes. Databaserna Education Source, ERIC, British Education Index, Australian Education Index och Education Database är ämnesdatabaser inom utbildningsvetenskap. Scopus är ämnesövergripande.

Sökningarna i genomfördes i april och maj 2017.

Sökning i skandinaviska vetenskapliga databaser

Åtta nordiska databaser och/eller webbportaler användes för att förbättra förutsättningarna att identifiera forskning som genomförts i ett sammanhang som liknar det svenska. SwePub, Libris, Diva, Skolporten, NB-ECEC, Oria (uio.oria.no), Den Danske Forskningsdatabasen och Idunn genomsöktes. Sökord både på engelska och på databasens originalspråk användes.

Handsökning utvalda tidskrifter

Handsökning är en teknik där man manuellt söker igenom tidskrifter för att hitta litteratur som söksträngen eventuellt inte fångat in. Handsökning i ämnesrelevanta tidskrifter genomfördes i juni 2017. De utvalda tidskrifterna var sådana som i relevansgranskningen visats generera många relevanta träffar. Vissa hade också pekats ut av projektets externa forskare som viktiga tidskrifter. Sökningen gjordes 3 månader bakåt i tiden från datumet för litteratursökningen i de internationella vetenskapliga databaserna för de tidskrifter som redan fanns indexerade i databaserna.

Tidskrift	
Early Child Development and Care	Volume 187, 2017
Early Childhood Education Journal	Volume 45, 2017
Early Years	Volume 37, 2017
European Early Childhood Education Research Journal	Volume 25, 2017
International Journal of Early Childhood	Volume 49 April 2017: Issue 1, Pages 1-132: Volume 48, April 2016- November 2016, Issue 1-3

Citeringssökning

Citeringssökning är en teknik för att hitta studier som citerat en utvald studie. Citeringssökningen utfördes i januari på alla studier som bedömts som ämnesrelevanta efter fulltextgranskning. Citeringsdatabasen Scopus användes i första hand. Om studien inte hittades i Scopus användes Google scholar. Förutom att citeringssökningen letar efter studier i ytterligare nya databaser så är det också en kontrollfunktion för att säkerställa att söksträngen konstruerats på rätt sätt.

Citerad studie	Antal citeringar (enbart artiklar)	Efter dubblettkontroll
